

ChildcarePAY

Let parents pay the way they want with ChildcarePAY.

ChildcarePAY, an add-on to ChildcareFORMS, takes the hassle out of fee payment by letting parents pay during online enrollment. Increase enrollments by providing parents with **simple, convenient online payment**. And save time by **eliminating manual payment processing**. Plus, you can rest assured all financial data is safe and secure.

- **Make payment part of enrollment.** An add-on to [ChildcareFORMS](#) online enrollment software, ChildcarePAY provides a seamless and simple experience for parents by including fee payment as part of online enrollment.
- **Let parents pay the way they want.** Today's Millennial parents don't use cash or carry a checkbook. They want convenience, simplicity, and digital payments. Let parents pay fees with credit card, debit card, or direct debit (ACH).
- **Eliminate payment processing work.** Save your staff hours by eliminating manual payment processing for registration, waitlist, and supply fees. Your staff won't spend one minute on payment processing or trips to the bank.
- **Keep payment data secure.** All financial data is encrypted, transmitted, and stored securely at a Level-1 PCI-certified service provider.
