

ChildcareFORMS

ChildcareCRM

Increase occupancy completion with ChildcareFORMS, online registration software.

Don't waste time on registration paperwork—sending reminders and chasing down missing information. Not to mention the inconvenience for parents who have to print forms, scan them or find extra time to drop off the forms at the centre. It's a poor experience for you and your families. But it doesn't have to be. ChildcareFORMS, online enrolment software, **boosts enrolment by making it easy for parents to enrol and pay fees online**. Plus, you save time by automating the registration journey and eliminating manual work to process fee payments.

Simplify the registration process with our online enrolment packet, guardian authorised forms and parent e-signature.

Stop the paperwork chase by getting complete enrolment packets every time with required form fields.

Offer forms to parents in their preferred language—English, Spanish, French, German, Japanese, or Chinese.

Save time with automated email and text reminders to keep parents moving through the enrolment process.

“ChildcareFORMS has been great for our preschool. It's been much easier for new parents to fill out their enrolment information online. Our administration team really likes it because it simplifies the registration process and number of papers needed for new parents.”

Kayley Davis
